**DETAILED ACTION**

***Election/Restrictions***

***Species election***

1. Claims 1, 4, 28, and 31 are generic to a plurality of disclosed patentably distinct species comprising the primer-blocking groups PO<sub>4</sub>, a thio group, and a phosphorothiol group. The species are independent or distinct because they represent unique chemical entities. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Claims 1, 11, and 12 are generic to a plurality of disclosed patentably distinct species comprising the modified bases of 8-oxoguanine, 8-oxoadenine, fapy-guanine, methyl-fapy-guanine, fapy-adenine, aflatoxin B1-fapy-guanine, 5-hydroxy cytosine and 5-hydroxy-uracil. The species are independent or distinct because they represent unique chemical entities. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
